Work Allocation

All members of the group took part in the bulk of the code development, with new tasks assigned to each member when available. Therefore we will go into which method was implemented by which member, and only state which part of the project was lead by each member.

- Omer Benami - testing, results analysis, methods research, maintenance guide

- Matan Lotem - work plan, final paper, chimera based code

- Guy Rom - code design, documentation, version control

- Saar Katz - user interface, user guide
